

Job Title: Quality Assurance Manager
Requisition #: 909
Location: Rogers Corporation
Chandler, AZ (Chandler Blvd and Kyrene Rd)

Rogers Corporation, (NYSE: ROG), headquartered in Rogers, Connecticut US, is an assertive, agile enterprise, coordinating our strengths, and integrating our resources to support the skyrocketing demand for computers and wireless communication products and services. To keep up with today's demands, Rogers needs a progressive work force to develop and implement specialty state-of-the-art products. Rogers provides excellent opportunity for those seeking to grow with a global, results-oriented company. We are looking for people who can make things happen, strive for continuous improvement, and like the challenges of a company which is growing

Job Purpose:

Will lead the Quality Department of the Advanced Circuit Materials Division on Chandler, AZ with matrix management and influence leadership of ACMD quality locations in Belgium, CT and China. Create a culture of quality from launch of new products through end of product life cycle. Will work closely with industry standards such as IPC and UL to ensure compliance. Will lead/create a QA/QC global team that ensures consistency of products between all sites. Will be viewed as the champion for robust processes and procedures. Will be the liaison for customer audits, customer complaint reductions and ongoing quality initiatives.

Essential Functions:

Creates (or modifies current system) and communicates the quality plan which supports achieving the key objectives of the business and assures quality systems and policies are in compliance with ISO (and or similar) quality systems.

Develops and or supports product launch quality systems that ensure a minimum of launch failures.

Creates and monitors a system (with use of data and analysis) that routinely checks the quality of various products and processes at all locations.

Acts as the liaison for all customer audits and complaints that require activity from the Chandler location.

Works toward creating a culture where quality is made as an integral part of the entire manufacturing process. Including inbound raw materials to customer use of Rogers materials.

Creates and executes a succession plan for all key levels of Global QA organization.

Required Qualifications:

BS in Engineering or technical degree.

Minimum of five years demonstrated success in QA/QC global management. Knowledge and proven use of statistics, Six Sigma or other data collecting and analytic tools. Must have ISO knowledge and successful experience in PCB, wireless, HF or electronics industry. Will initially travel at least 20% of time to various sites (including customer and Rogers) and then reduce as appropriate. Must be a US Citizen or Permanent Resident due to ITAR regulations.

Preferred Qualifications:

MS or higher level degree in technical field. ASQC or similar accreditation. Previous experience in key role within IPC (or similar inelectronic fabrication), UL or leading industry specific organization is a plus.
