Intuit is a leading software provider of business and financial management solutions for small and mid-sized businesses, consumers and accounting professionals. You probably know us by our flagship products, QuickBooks®, Quicken® and TurboTax®, but that's just the start. We are currently going through a fundamental transformation from a shrink-wrapped software company to one of the country's leading providers of web-based applications and solutions.

Come join Intuit as part of the Process Excellence team as a Senior Business Excellence Partner. We are looking for creative problem solvers with a passion for innovation to join our team and revolutionize the way the world does business.

- Build continuous improvement capability and build a culture of innovation
 - Transfer continuous improvement knowledge and skills... engage, teach, coach
 - Apply Intuit's Leading @ Intuit principles and methods to partner with process owners
 - Lead through influence and partnership
 - Assess, analyze, influence and contract with stakeholders
 - Provide constructive feedback and coaching to peer and client groups
 - Demonstrate initiative, innovation, and creativity to drive breakthrough thinking
 - Plan, organize, and execute initiatives
 - Facilitate teams through improvement efforts
 - Develop linkages and partnerships across the business.
 - Continually develop process improvement skills
 - Self-assess development opportunities/gaps and create action(s) to improve
-
- 5+ yrs of business process improvement experience
 - Customer focused (outside-in vs. inside-out)
 - Experience with implementing lean and/or Toyota Production System principles
 - Strong applied six sigma skills (Black Belt, Master Black Belt certification a plus)
 - Successful application of DMAIC/DFSS/DMADV
 - Strong DOE results
 - Led cross-functional teams
 - Proven track-record of change management
 - Strong strategic thinker
 - Energy amplifier and team player
 - Excellent communication skills
 - Experiences with best practices within product development processes... software development highly desirable
 - A background in one or more of the following is highly desired: Program/Project Management, Resource Allocation, Resource Management, Product Management
 - An MBA a plus
